

UNLOCK SUPPLIER COST DATA FOR BOTTOM LINE SAVINGS

E-SOURCING SHOULD-BE COSTS NEW PROGRAM MANAGEMENT

ProcureForce is APD's technology platform that provides buyers with a direct look into supplier cost structures, enabling organizations to build and apply should-be cost models to achieve unparalleled savings. Sourcing is much more efficient with built-in E-Sourcing functionality, and buyers have the analytics at their fingertips to collaborate with suppliers to optimize costs, both on existing products and new programs.

ProcureForce brings Big Data Analytics to purchasing to smartly manage:

Detailed Cost Breakdowns

Systematically reduce purchased costs using an unlimited number of detailed cost breakdowns with each e-RFQ. You can monitor which suppliers are providing detailed cost breakdowns, requiring them for RFQ responses or keeping them optional.

Supplier Performance

Easily track supplier information and credentials, and manage supplier performance scorecards. Suppliers self-manage credentials, with automatic notifications when updated credentials are required.

Supplier Quote Evaluation

Evaluate supplier quotes with side-by-side comparisons to competitor quotes and should-be cost models. Should-be cost models are automatically generated from past supplier quotes you already have.

Purchased BOM Management

Track cost and sourcing status on purchased components bill of materials, including history and causes. Built in reports allow you to easily analyze and optimize material cost impacts on new programs and profit plans.

We help you make purchasing a competitive advantage
